

IEEE TRANSACTIONS ON CLOUD COMPUTING

The *IEEE Transactions on Cloud Computing* (TCC) is the premier journal for the fast-growing field of cloud computing. It publishes peer-reviewed articles that present innovative research ideas and application results in all areas of cloud computing. Submissions on novel theory, algorithms, systems, applications, and performance analyses as related to cloud computing will be considered for the transactions. The transactions will specifically consider submissions in the areas of virtualization and container technologies, resource management and optimization in the cloud, software-defined systems, cloud-based big data management and analytics, cloud programming models and tools, cloud security and privacy, cloud interoperability and integration, energy management in cloud data centers, mobile cloud computing, service life-cycle management, cloud performance and dependability, business support and operational support systems, and cloud economics. This title will also consider submissions on X as a Service, where X includes Infrastructure, Storage, Network, Platform, Database, Information, Security, Management, Software, Backend, and Business Process.

TCC EDITOR-IN-CHIEF

Hui Lei

IEEE Fellow and CTO Watson Health Cloud at IBM

TCC Steering Committee Members
